of Science and Technology

WROCLAW UNIVERSITY
OF SCIENCE AND TECHNOLOGY
PROSPECTUS

2019
2020

Table of contents

Bachelor's Degree Programmes

Electronic and Computer Engineering	4
Applied Computer Science	6
Organizational Management	8
Mechanical Engineering	10

Master's Degree Programmes

Architecture	14
Spatial Management	16
Civil Engineering	18
Advanced Chemical Engineering and Nanotechnology	20
Advanced Nano- and Bio-Materials MONABIPHOT	22
Bioinformatics	24
Chemical Nano-Engineering	26
Medicinal Chemistry	28
Technology of Fine Chemicals	30
Advanced Applied Electronics	32
Advanced Informatics and Control	34
Embedded Robotics	36
Internet Engineering	38
Modern Telecommunications	40
Control in Electrical Power Engineering	44
Renewable Energy Systems	46
Mining Engineering	48
Geotechnical And Environmental Engineering	50
Environmental Quality Management	52
Business Information Systems	54
Computer Science and Technology	56
Renewable Sources of Energy	60
Refrigeration and Cryogenics	62
Automotive Engineering	64
Production Management	66
Computer Security	68
Big Data Analytics	70
Electronics, Photonics, Microsystems	72
Applied Mathematics	74
Preparatory Polish Language Course	76
Preparatory English Language Course	78

Wrocław University
of Science and Technology

WELCOME

to your custom **Prospectus** of Wrocław University of Science and Technology. It contains information relevant to your interests in future education.

By viewing the individual course pages you will find specific information on courses available in English as a medium of instruction and admission details you will need, such as: the programme's duration, the deadline for application and the start date. You can also find sections on job prospects and courses you will attend during your studies. We hope you find it both useful and interesting.

Contact details

We look forward to seeing you at Wrocław University of Science and Technology!

Your Admission Officers

DESCRIPTION

Electronic and Computer Engineering (ECE) programme meets the needs and demands of the modern labour market for modern electronics. This field of study combines the knowledge of traditional electronics and information technology, industrial automation and robotics.

ABOUT STUDIES

- » **Duration:** 7 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** 1st October 2019
- » **Programme coordinator:**
Grzegorz Budzyń, Ph.D., D.Sc.
grzegorz.budzyn@pwr.edu.pl

JOB PROSPECTS

The profile of companies that will benefit from the competence of graduates is mainly production and service. The demand for specialists with the skills to integrate electronic equipment and analogue and digital systems (including microprocessors) in broadly understood industrial automation is already high and is expected to increase in the future. These skills include PLC programming, PAC, SCADA systems and robotic systems, commissioning of control systems, local and remote maintenance, remote supervision of operating systems for production control. Additionally, the ability to design widely defined control systems, telemetric systems and measurements will be very positively received on the labor market. Currently, there is a significant increase in the number of companies operating in the field of IoT and the integration of these products into one system (e.g. Smart homes). This sphere of activity at every stage, from design, through production to service, requires the combination of engineering knowledge in the field of electronics with information in the field of computer science.

ENTRY INFORMATION

Requirements: secondary school certificate, received after the completion of a recognized secondary school (total 12 years of education), being the equivalent of Polish Matriculation certificate.

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
English: Equivalent of minimum TOEFL IBT– 87 points or 6.5 points IELTS . List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **1500 EUR** per semester
EU/EFTA students: **no tuition fee**
- » **Application fee:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl

CONTENT

SEMESTER 1

- » Mathematical Analysis
- » Mathematical Algebra
- » Introduction to Programming
- » Metrology
- » Philosophy

SEMESTER 2

- » Mathematics Analysis 2
- » Mathematics for Electronics
- » Object Oriented Programming
- » Electronic
- » Physics
- » Foreign Language

SEMESTER 3

- » Physics for Electronics
- » Scientific & Engineering Programming
- » Electronic Components & Sensors
- » Electronic Technology
- » Systems Theory
- » Foreign Language
- » Sports

SEMESTER 4

- » Programming Systems & Environments
- » Introduction to Microcontrollers
- » Electronic Circuits
- » Introduction to Automation and Robotics
- » Fundamentals of Telecommunication

SEMESTER 5

- » Computer Networks
 - » Digital Signal Processing
- Elective courses 1 (choice of 3 out of 5):**
- » Advanced Topics in Robotics
 - » Microcontrollers
 - » Artificial Intelligence & Computer Vision
 - » Optoelectronics
 - » Wireless Systems

SEMESTER 6

- » Team & Preengineering Project
 - » Electroacoustic
- Elective courses 2 (choice of 3 out of 5):**
- » Control Systems Engineering
 - » Embedded Systems
 - » Real Time Operating Systems
 - » Lasers, Fibers & Applications
 - » Communication Systems & Networks

SEMESTER 7

- » Internship
 - » Final Project
 - » Diploma Seminar
- Elective courses 3 (choice of 2 out of 15)**
- » Author Law
 - » Business

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The programme emphasizes practical aspects of Computer Engineering and can be adapted to the student's interest. The final effect of studies is obtaining of first level competences - knowledge, skills and qualifications - in accordance with "The Teaching Standards" in the field of Computer Science. The students obtain the basic knowledge of mathematics and physics, general computer science areas, such as: operating systems, algorithms and data structures, languages and programming techniques, digital and analog technique, computers architecture, project management as well as ethical and legal aspects of computer science. The graduates will be able to: implement and deploy effective, reliable, safe and meeting users requirements information systems; comprehend, evaluate and deploy different solutions used in scope of computer systems; maintain, install, administrate and deploy tools and problem oriented information systems, develop system documentation.

ABOUT STUDIES

- » **Duration:** 7 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** 1st October 2019
- » **Programme coordinator:**
Andrzej Siemiński, Ph.D.
andrzej.sieminski@pwr.edu.pl

JOB PROSPECTS

Employment in informatics companies that build, deploy and maintain IT tools and systems, particularly employment in project teams, especially programming teams, in organizations and companies using software tools and systems and continuing studies at the Master's level.

ENTRY INFORMATION

Requirements: secondary school certificate, received after the completion of a recognized secondary school (total 12 years of education), being the equivalent of Polish Matriculation certificate.

Each application is assessed individually on its merits.
If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT-87 points or 6.5 points IELTS. List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **1500 EUR** per semester
- » EU/EFTA students: **no tuition fee**
- » **Application fee:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl

CONTENT

The student is required to complete 2475 hours of courses (equivalent to 210 ECTS). The programme consists of lectures and practical activities: laboratories, tutorials, seminars and projects). Students must receive credits for all subjects and additionally from practical training. The programme of the training must be consulted with the programme coordinator. Students should write a degree thesis under the direction of a faculty member.

SEMESTER 1

- » General Physics I
- » Mathematical Analysis
- » Algebra and Analytic Geometry
- » Logic for IT
- » Structural and Object oriented Programming
- » Computer System Organization

SEMESTER 2

- » General Physics II
- » Mathematical Analysis
- » Discrete Mathematics
- » Operating Systems
- » Data Structures and Algorithms
- » Computer Architecture

SEMESTER 3

- » Theory of Probabilistic and Statistics
- » Introduction to IT
- » Effective Programming Techniques
- » Computer Networks
- » Basics of Entrepreneurship
- » Foreign Language I
- » Sports

SEMESTER 4

- » Systems Analysis and Decision Support Methods
- » Programming Paradigms
- » Data Bases
- » Basics of Software Engineering
- » Foreign Language II
- » **Modules of elective courses (select one of the courses within the module)**
- » M1: Administration of Computer Systems:
■ Linux server administration ■ Microsoft Systems Administration

SEMESTER 5

- » Software Engineering
- » Script Languages
- » Cybersecurity

- » Presentation Techniques
- » **Modules of elective courses (select one of the courses within the module)**
- » M2: Web Technologies: Web Systems Programming ■ .NET Web Applications
- » M3: Database Design: ■ Database Design ■ Oracle Databases – programming ■ Database Systems Engineering
- » M4: Mobile Applications: ■ Developing Mobile Applications for Android Platform ■ Developing Mobile Applications for iOS Platform

SEMESTER 6

- » Data Warehouses
- » Artificial intelligence and Knowledge Engineering
- » Practical training
- » **Modules of elective courses (select one of the courses within the module)**
- » M5: Project Management Basics: ■ Introduction to IT Project Management ■ IT Project Management Support ■ Process –Based Management of IT Project
- » M6: Distributed Systems: ■ Distributed Computer System ■ Programming Microsoft Azure
- » M7: Programming Tools and Technologies:
■ .NET Software Development ■ Computer Game Programming ■ Advanced Web Technologies
- » M8: Multimedia: ■ Computer Graphics
■ Programming Multimedia Applications ■ Digital Media Processing Techniques

SEMESTER 7

- » Diploma Seminar
- » Diploma Thesis
- » IT Social and Professional Problems
- » Team Project
- » **Modules of elective courses (select one of the courses within the module)**
- » M9: Current trends in Computer Science: ■ Data Science ■ Neural Networks ■ Problem Solving Using Metaheuristics ■ Human-Computer Interaction
- » M10: Humanistic subject: ■ Humanistic subject 1
■ Humanistic Course 2

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

Undergraduate studies in management prepare students for future work as management/organization specialists, middle-level managers, to develop their own small enterprises, or for post-graduate studies. The graduates will develop their theoretical and practical knowledge in the field of management and related sciences, concerning issues, rules and problems associated with the functioning of organizations such as: enterprises, public institutions and governance structures. The graduates will be ready to undertake crucial roles in project management within commercial or administrative organizations. Moreover, the graduates will be able to communicate and negotiate effectively, as well as work in teams.

ABOUT STUDIES

- » **Duration:** 6 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** 1st October 2019
- » **Programme coordinator:**
Prof. Rafał Weron
rafal.weron@pwr.edu.pl

JOB PROSPECTS

The knowledge and skills obtained give the graduates the possibility of getting a job as a management/organization specialist, a middle-level manager in public and private organizations (industry, healthcare, education, services, commerce, central and local authority institutions, etc.), developing their own small enterprises or continuing education at the Master's level.

ENTRY INFORMATION

Requirements: secondary school certificate, received after the completion of a recognized secondary school (total 12 years of education), being the equivalent of Polish Matriculation certificate.

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer :
admission@pwr.edu.pl

CONTENT

Forms of teaching: Lectures, laboratories, tutorials, projects, research

SEMESTER 1

- » Civil and Commercial Law
- » Essentials of Management
- » Information Technology
- » Mathematics
- » Microeconomics
- » Psychology

SEMESTER 2

- » Descriptive Statistics
- » Essentials of Finance
- » Macroeconomics
- » Organizational Science
- » Sociology
- » Work Environment Physics
- » Computer Science Module
- » Social Competences Module
- » Sports

SEMESTER 3

- » Mathematical Economics
- » Financial Accounting in the Organizational Decision Making Process
- » Marketing in the Information Society
- » Organizational Behavior
- » Computer Science Module
- » Economic Science Module
- » Foreign Language I

» SEMESTER 4

- » Contemporary Organizational Methods and Techniques
- » Corporate Finance
- » Logistics
- » Marketing Management
- » Operations Management
- » Legal Science Module
- » Computer Science Module
- » Foreign Language II

SEMESTER 5

- » Diploma Seminar
- » Financial Management
- » Leading Projects in Modern Organizations
- » Marketing Research
- » Methods and Tools of Data Analysis
- » Modern Human Resource Management
- » Total Quality Management
- » Computer Science Module

SEMESTER 6

- » Bachelor's Thesis
- » Business Process Management
- » Financial analysis supported by computers
- » Information Systems in Management
- » Introduction to risk management
- » Management training

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

This programme prepares the graduates for creative engineering work in machine design, machine operation and manufacturing processes. Student will be familiar with fundamental methods, techniques, tools and materials used for solving engineering tasks in the field of Mechanical Engineering. A student acquires a directional specialty by studying mechanics, machines theory, principles of machine design, thermodynamics, computer aided engineering techniques and manufacturing technologies. The programme gives reliable ground to take a job in any segment of industry and services where designing, producing or maintaining machines and equipment is essential for a business.

ABOUT STUDIES

- » **Duration:** 7 semesters
- » **Mode of study:** Full time
- » **Faculty of:** Mechanical Engineering
- » **Language of instruction:** English
- » **Start date:** 1st October 2019
- » **Programme coordinator:**
Adam Jednoróg, Ph.D.,
adam.jednorog@pwr.edu.pl

JOB PROSPECTS

The graduate of The Faculty of Mechanical Engineering is a versatile educated engineer, equipped with basic and advanced knowledge as well as industrial practice.

ENTRY INFORMATION

Requirements: secondary school certificate, received after the completion of a recognized secondary school (total 12 years of education), being the equivalent of Polish Matriculation certificate.

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer.

CONTENT

SEMESTER 1

- » Engineering Graphics: Descriptive Geometry
- » Elementary Linear Algebra
- » Mathematical Analysis
- » Materials Chemistry
- » Physics
- » Engineering Materials Technology
- » Information Technologies
- » Essential of Management
- » Introduction to Philosophy

SEMESTER 2

- » Engineering Graphics: Engineering Drawing
- » Statistics for Engineers
- » Mechanics I
- » Materials Science I
- » Thermodynamics
- » Theory of Machines
- » Electrical Engineering
- » Electronics
- » Ecology and Environment
- » Sports

SEMESTER 3

- » Engineering Graphics 3D
- » Ordinary Differential Equations
- » Mechanics II
- » Materials Science II
- » Strength of Materials I
- » Fluid Mechanics
- » Chipless Processes – Casting
- » Polymers I
- » Programming in MATLAB

SEMESTER 4

- » Fundamentals of Machine Design I
- » Theory of Mechanisms and Manipulators
- » Chipless Processes -Plastic Forming
- » Chipless Processes -Welding Metallurgy
- » Strength of Materials II
- » Fundamentals of Automatic Control
- » Ergonomy and Safety
- » Intellectual Property Law
- » Foreign Language – B level

SEMESTER 5

- » Fundamentals of Machine Design II
- » Manufacturing Processes - Machining
- » Metrology
- » Hydraulic, Hydrotronic and Pneumatic Systems
- » Drive Systems
- » Finite Elements Method
- » Vehicle Engineering
- » Tribology
- » Foreign Language - B level

SEMESTER 6

- » Offroad Vehicles Engineering
- » Hydraulic Drive Systems
- » Internal Combustion Engines
- » Polymers in Engineering
- » Carrying Structures
- » Production System Organisation
- » Manufacturing Systems CNC
- » Diploma Proseminar
- » Professional Training

SEMESTER 7

- » Vehicles Loading Modelling
- » Engineering in Medicine
- » Fundamentals of Exploitation and Repair
- » Management in Production
- » Diploma Seminar
- » Thesis: Final Engineering Project

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The programme ends in a degree examination comprising an oral examination and presentation of the diploma project. 20 ECTS credits are awarded to students who successfully prepare for the degree examination and write their master thesis which includes diploma project. The scope of subjects in the oral examination covers four basic areas of the curriculum: theory of architecture, theory of urban planning, technology and the history of architecture and urban planning. The degree project consists of a conceptual architectural design with elements of construction design or an urban planning design. After completion of the master's programme in Architecture and Urban Planning students are awarded the Master's Degree in Architecture. Graduates of program are equipped with knowledge and skills, which enable them to enroll in the doctoral and specialized postgraduate programmes.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinator:**
Joanna Jabłońska, Ph.D.
joanna.jablonska@pwr.edu.pl

JOB PROSPECTS

The graduates will be able to start their professional career in areas of architecture and urban design and to cooperate with specialists in technical areas of technology. The program in Architecture and Urban Planning equips students with managerial skills and proficiency in foreign languages, especially technical English language. Upon completion the graduates may seek work in architectural and urban design studios, local and national administration, research institutions, research and development centers and consulting agencies.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree. Minimum 210 ECTS. Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer.

- » **Deadline for application:**

CONTENT

SEMESTER 1

- » An Introduction to Mathematical Modelling 1
- » Architectural Design 1 (Commercial)
- » Elective Design Study
- » Foreign Language
- » Structures in Contemporary Architecture 1
- » History of Culture and Art
- » Conservational Design 1 (Conservation of Architecture)
- » Transformation of Urban Structures

SEMESTER 2

- » Social Science
- » Humanities Course
- » Physics of Buildings (Acoustics and Aerodynamics)
- » Architectural Design 2 (Workplaces)
- » Ecological Architecture
- » Elective Design Study
- » Conservational Design 2 (Revaluation of Urban Complexes)
- » Structures in Contemporary Architecture 2
- » History, Preservation and Revitalization of Greenery
- » MSc Seminar
- » Theory of Architecture
- » Foreign Language

» SEMESTER 3

- » Elective Design Study
- » New Building Technologies
- » Spatial Planning
- » Design Thesis

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

Planning is an inter- and multidisciplinary field of knowledge and practice which allows professionals to deal with the spatial dimension of human activities. Courses and modules provide education in systems thinking and complexity (systems theory, environmental science) as well as prepare students for leadership (management) and focus on policy making (urban planning, regional policy, EU spatial policy and marketing places) as well as on planning law and plan preparation (techniques of plan preparation) to prepare students for the complicated processes and procedures in planning practice. Courses in models in spatial policy and spatial economics seek to equip students with methodological tools for spatial analysis and scenario development. Wrocław University of Science and Technology is the only university in Poland which offers the courses in modelling and computer simulation of spatial development. The programme consists of 3 semesters and apart from compulsory courses provides the variety of elective courses - from tourism to advanced tools in spatial modelling and participatory planning. Additionally, at least one international module is being open in the course of the programme. The modules are run in the forms of lectures, studios and seminars. Students are offered to enjoy at least one studio project each semester. A Master's thesis (which can include also a professional project, plan or strategy) exploring a planning research topic must be produced as a final part of the program (20 ECTS). The thesis has to be presented in both, written and oral form, to a committee of academics for examination.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinator:**
Wawrzyniec Zipser,
Ph.D. wawrzyniec.zipser@pwr.edu.pl

JOB PROSPECTS

The graduates in spatial planning can plan their career both in public and private sector. They are prepared to work at the municipalities, in the planning units as well as in regional authorities offices and at the national level administration (i.e. Ministry of Infrastructure, Ministry of Regional Development). They can also develop their career in public agencies (i.e. linked to the environmental issues, water management, transportation, tourism, etc.). Graduates are prepared to lead the teams working on statutory plans (local plans, urban development plans) as well as on the optional planning studies and plans. They can also work in the private real estate agencies, investment banks and other companies having interest in spatial dimension of the economy. The graduates are prepared to begin their doctoral studies in planning.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree. Minimum 210 ECTS . See: Important note for Entry Criteria

Important note for Entry Criteria:

Master's programme in planning is open to students with a non-planning background as long as they have completed 60% of all compulsory courses of an undergraduate planning degree. This means that programme is especially suitable for those who completed their first degree in: environmental studies, geography, transport studies, landscape architecture, architecture. Also background in public administration, economy, sociology or mathematics, physics and IT and computer studies is welcome. Each application is assessed individually on its merits. If in doubt, please contact the Admission Officer.

CONTENT

(L=lecture; Lab=computer lab; PS=project/design studio; C=classes; S=seminar)

SEMESTER 1

- » Urban Planning 1 (L:30h)
- » Rural Planning (L:15h)
- » Law in Spatial Planning (L:15h)
- » Introduction to Architecture (L:30h)
- » Systems Theory (L:30h)
- » Environmental Studies and Planning (L:15h, PS:45h)
- » Legislative Technique in Planning (L:30h)
- » Models and Simulations in Planning (L:30h; Lab:30h)
- » Optional courses (30h)
- » Optional Atelier (L:15h; PS:45h)
- » Foreign language A1/A2 (C:45h)
- » Foreign language B2+ (C:15h)

SEMESTER 2

- » Urban Planning 2 (L:30h; PS:60h)
- » Planning Theory (L:30h)
- » Legislative Technique in Planning (C:30h)
- » Planning Systems (L:30h)
- » Regional Planning (L:15h, PS:45h)
- » Territorial Marketing (L:15h)
- » Master's Thesis Seminar (S:15h)
- » Management sciences (to select) (L:30h)
- » Optional courses (30h)
- » Optional Atelier (L:15h; PS:45h)
- » Elements of higher mathematics (L:30h)
- » Humanities Course

SEMESTER 3

- » Regional Policy (L:30h)
- » Territorial Policy of the EU (L:30h)
- » Elective courses (30h)
- » Elective Atelier (L:15h; PS:45h)
- » Master Thesis Atelier

SAMPLE ELECTIVE COURSES:

Tourism and tourism planning, Advanced 2D and 3D tools in Planning, Introduction to the Regional Development, Territorial Approach in the EU Policies.

SAMPLE ELECTIVE COURSES:

Advanced Methods for the Spatial Decision-Making Processes, Participative Planning, GIS-based Territorial Analysis, Development Strategies, Planning for Local Communities, Transportation Analysis and Forecasting Techniques.

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

Students gain theoretical knowledge and practical skills connected with structure design, construction materials and technologies as well as static and dynamic analysis of reinforced concrete, prestressed concrete, metal, wooden, ground and complex constructions. They learn how to use advanced computational models and modern IT solutions in civil engineering. In addition to participating in lectures, auditoriums, labs, seminars and projects students may also take part in student scientific groups and international exchanges. A number of courses can be selected by students depending on their interests and professional plans. At the end of the MSc study students write master's thesis on a subject related to designing of engineering structures. The MSc diploma offers an opportunity to continue education at Ph.D. studies.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** 1st October 2019 or February 2020
- » **Programme coordinator:**
Prof. Jan Bień, Ph.D., D.Sc.
jan.bien@pwr.edu.pl

JOB PROSPECTS

The graduates are prepared for:

- » solving complex design, organisation or technological problems,
- » authorization to independent design and construction in civil engineering,
- » developing and implementing research programmes,
- » carrying out job in international enterprises,
- » participation in marketing and promotion of construction products,
- » continuing education and participation in research in the fields which are directly related with construction and construction production,
- » continuous education and improving qualifications and extending knowledge,
- » team work and large team management.

The graduates are prepared to work in design offices and construction enterprises, scientific institutions and R&D centers, institutions involved in building infrastructure management or dealing with counseling or dissemination of construction related knowledge.

ENTRY INFORMATION

Requirements: Bachelor's or Master's Degree in Civil Engineering, Environmental Engineering, Architecture, Hydrotechnical Engineering obtained either in Poland or abroad.

Each application is assessed individually on its merits. If in doubt, please contact the Admission Officer.

CONTENT

The main study of Civil Engineering consists of 20 units, covered as lectures, projects and seminars. In addition, some elective units are offered covering also language courses.

SEMESTER 1

- » Advanced Computer Aided Engineering
- » Concrete Structures - Objects
- » Metal Structures - Objects
- » Selected Topics in Structural Mechanics
- » Theory of Elasticity and Plasticity
- » Physics of Modern Materials
- » Selected Topics in Mathematics
- » Selected Topics in Geoengineering – Foundation
- » Hydraulics in Civil Engineering
- » Ethics for Engineers/Ethics in Business
- » Foreign Language 1

SEMESTER 2

- » Dynamics
- » Underground Structures – Urban Infrastructure
- » Railways
- » Roads, Streets and Airports
- » Bridges
- » Construction Techniques and Processes
- » Apartment Building
- » Computational Mechanics
- » Foreign Language 2

SEMESTER 3

- » Master's Thesis Tutorial
- » Master's Thesis
- » Construction Project Management - 2 elective courses (one from each group)

ELECTIVE COURSES 1

- » Artificial Intelligence in Civil Engineering
- » Modern Testing Methods for Non-destructive Inspection of Building Structures
- » Advanced Building Physics
- » Hydrology for Building Engineers
- » Effective Properties of Composites – Introduction to Micro-mechanics

ELECTIVE COURSES 2

- » Pre-stressed Concrete Structures
- » Timber Structures
- » Conservation and Strengthening of Monumental Heritage Structures
- » Methods of Applied Statistics (Geostatistics)
- » Sustainable Building

Questions? Please contact the Admission Officers
e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The programme of studies directly reflects the current needs of the labour market in the field of Chemical and Process Engineering, providing employment opportunities. It is designed to provide the graduates with the following learning outcomes: knowledge on developments and new developments in the field of chemical engineering, ability to use new advances in the field of chemical engineering, basic understanding of the processes of governance, knowledge of the functions, principles and management instruments, including quality management and identification of the main problems of management, knowledge of the design of process devices and systems, integration and process intensification, performing a complete process design, the use of computer technology, including tools for exploring and simulating the dynamics of various processes. Advanced Chemical Engineering and Nanotechnology combines classical chemical engineering with bioprocess engineering, nano-engineering, chemical technology and environmental engineering. The graduation document certifies the degree in engineering chemistry with the notification of a deepened specialization in Advanced Chemical Engineering and Nanotechnology. Study for applicants without engineering degree study lasts 2 years, otherwise

ABOUT STUDIES

- » **Duration:** 3 or 4 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:**
October 2019 (4 semesteres programme, for applicants without engineering degree)
February 2020 (3 semesters programme, for applicatns possessing engineering degree)
- » **Programme coordinator:**
prof. Anna Trusek, Ph.D., D.Sc.,
anna.trusek@pwr.edu.pl

JOB PROSPECTS

The graduate has extended knowledge of mathematics, natural sciences and technical skills: professional solving of problems in the field of chemical engineering, conduct advanced research experiments, propose and optimize new solutions and independently analyze problems related to chemical and process engineering. The graduates are prepared for creative work in the design and operation of processes in the chemical industry. The graduate is prepared to run the own business.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree in Chemistry or related domains.

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** English: Equivalent of minimum TOEFL IBT– 87 points or 6.5 points IELTS . List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **2000 EUR** per semester
EU/EFTA students: **no tuition fee**
- » **Application fee:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl

CONTENT

The main study of Advanced Chemical Engineering and Nanotechnology consists of at least 23 units, covered as lectures, labs and seminars. In addition, some optional units are offered covering also language courses.

SEMESTER 0

- » Technical Safety
- » Methods of Materials Testing
- » Recycling of Materials
- » Measurement in Processing Apparatus
- » Fundamentals of Chemical Technology
- » Basic Unit Processes in Chemical Technology
- » Materials Science
- » Information Technologies
- » Technical Drawing/Engineering Graphics
- » Foundations of Chemical Engineering

SEMESTER 1

- » Advanced Engineering Graphics
- » Software for Simulation and Design of Chemical Systems
- » Renewable Energy Sources
- » Transport Phenomena in Chemical Processes
- » Process Equipment
- » Mathematical and Statistical Methods in Chemical Engineering
- » Chemical Nanoengineering
- » Modern Methods of Liquid Separation
- » Foreign Language

SEMESTER 2

- » Industrial Waste Management
- » Computer Simulations in Designing Materials for Chemical Processes
- » CFD-computer Modeling of Processes
- » Process Modeling in Chemical Engineering
- » Multiphase Systems in Chemical Processes
- » Biotechnology Process Engineering
- » Principles of Business
- » Graduate Laboratory I
- » Foreign Language

SEMESTER 3

- » Economics of Production Processes
- » Management of Quality in Chemical Enterprise
- » Philosophy of Science and Technology
- » Graduate Laboratory II
- » Graduate Seminar and Master Thesis
- » Sports

OPTIONAL COURSES

- » Statistical Thermodynamics in molecular modeling
- » Materials Used in Chemical Unit Operation
- » Microwaves and Other Advanced Thermal Technologies in Chemical Engineering
- » New Concepts and Solutions in Chemical Engineering

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

Advanced nano- and bio-materials MONABIPHOT is a Master's course which offers an original qualification in the highly innovative domain of nanomaterials and molecular photonics for materials science and biology. Skills will be acquired at the strongly interdisciplinary level needed to master emerging technologies and to develop original concepts and applications, aiming at novel technological breakthroughs in this domain. We offer courses concerning synthesis and characterization of new materials on the molecular and nano-scale with the special impact on biology. The introduction of the course's subjects help the student to acquire competences as future experts in material science, with special impact on nanomaterials. The language of the Advanced Nano- and Bio-materials MONABIPHOT Master's is English. Applicants must have a Bachelor's degree in Chemistry, Physics or Materials Science or related subjects, with a good background in mathematics and chemistry. The graduates could continue the career in research in nano- and/or bio-materials, as Ph.D. students or R&D associates in industrial laboratories in the rapidly emerging nanotechnology industry.

The programme is aimed at students already awarded or expecting a BSc (or a higher degree) or equivalent before the starting date of the term (September 2019 for the current applications).

ABOUT STUDIES

- » **Duration:** 3 or 4 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:**
October 2019 (4 semesteres programme, for applicants without engineering degree)
February 2020 (3 semesters programme, for applicatns possessing engineering degree)
- » **Programme coordinator:**
Katarzyna Matczyszyn, prof. PWR,
katarzyna.matczyszyn@pwr.edu.pl

JOB PROSPECTS

The graduate has extended knowledge of chemistry, materials science, natural sciences and technical skills: conduct advanced research experiments with the nanomaterials with the emphasis on biology, propose and optimize new solutions and independently analyze problems related to materials science. The graduates are prepared for creative work in the design and operation of new materials. The graduate is prepared to run the own business.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree in Chemistry or related domains (3 semester program).

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer.

CONTENT

The main study of Advanced Nano- and Bio-materials consists of at least 23 units, covered as lectures, labs and seminars. In addition some optional units are offered covering also language courses.

SEMESTER 0

- » Chemical Informatics
- » Biotechnology with Introduction to Industrial Microbiology
- » Environment Protection
- » Introduction to Materials Science and Engineering
- » Technical Safety
- » Technical Drawing
- » Recycling of Materials
- » Fundamentals of Chemical Technology
- » Measurements in Chemical Equipment
- » Introduction to Chemical Engineering
- » Electives (Molecular Biology, Fundamentals of Physical Chemistry)

SEMESTER 1

- » Liquid Crystals for Photonics
- » Modern Polymers
- » Bioorganic Chemistry
- » Fluorescence Spectroscopy and Bioimaging
- » Biophotonics
- » Mathematical Methods in Planning and Analysis of the Experiment
- » Foreign Language I & II

SEMESTER 2

- » Laser and Microscopic Techniques in Materials Analysis
- » Nanoscale Physics
- » Advanced Functional Materials
- » Nanomaterials
- » Molecular Electronics
- » Crystallography
- » Graduate Laboratory I

SEMESTER 3

- » Advanced Nanomaterials
- » Elective Courses (Nonlinear Optics, Biomaterials)
- » Graduate Laboratory II
- » Graduation Seminar and Thesis Preparation

DESCRIPTION

Bioinformatics constitutes an interdisciplinary research area, covering applications of computer science, chemistry and biochemistry to solve biological problems, usually on the molecular level. Typical activities include analysis of information contained in literature, genetic and structural databases, prediction of protein structure, drug and biocatalyst or biosensor design. The curriculum introduces programming skills necessary for automation of database searches and analysis of numerical and bioinformatics data, including analysis of new genome sequencing (NGS) results. The study programme includes advanced computer programming as well as specialized molecular biology techniques which are highly valued on present job market.

ABOUT STUDIES

- » **Duration:** 3 or 4 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:**
October 2019 (4 semesters, for applicants without engineering degree)
February 2020 (3 semesters, for applicants possessing engineering degree)

- Dr Edyta Dyguda-Kazimierowicz, Ph.D.
edyta.dyguda@pwr.edu.pl
- Prof. W. Andrzej Sokalski
sokalski@pwr.edu.pl

JOB PROSPECTS

The combination of computational skills and basic knowledge of biotechnology aims to prepare the graduates for work in research and development, manufacturing chemical software or databases, developing modern bioinformatics diagnostic services in medical laboratories, conducting quality control in environment protection pharmaceutical or food industry laboratories. Our graduates typically continue level III (Ph.D.) education in renowned academic institutions or are employed by national and international companies.

ENTRY INFORMATION

CONTENT

The curriculum is composed at least of 25 (36) units, covered as lectures, labs or seminars.

SEMESTER 0

- » Chemical Informatics
- » Biotechnology with Introduction to Industrial Microbiology
- » Environment Protection
- » Introduction to Materials Science and Engineering
- » Technical Safety
- » Technical Drawing
- » Recycling of Materials
- » Fundamentals of Chemical Technology
- » Measurements in Chemical Equipment
- » Introduction to Chemical Engineering
- » Electives (Molecular Biology, Fundamentals of Physical Chemistry)

SEMESTER 1

- » Bioinformatics
- » Molecular Dynamics
- » Networks and Workstations with UNIX System
- » Applied Informatics
- » Bioprocess Project
- » Theoretical Chemistry
- » Foreign Language I & II

SEMESTER 2

- » Molecular Modeling
- » Bionanotechnology
- » Rational Drug Design
- » Advanced Programming and Numerical Methods
- » Introduction to Multimedia in Biotechnology
- » Methodology of Experimental Research
- » Instrumental Drug Analysis
- » Retrieval of Scientific and Technical Information
- » Principles of Business
- » Graduate Laboratory I

SEMESTER 3

- » Computational Genomics
- » Genetic Engineering in Analytics and Diagnostics
- » Mathematical Methods in Design and Analysis of Experiment
- » Philosophy of Science and Technology
- » Economics and Organization of Industrial Biotechnology
- » Graduate Laboratory II
- » Graduation Seminar and Thesis Preparation

DESCRIPTION

Erasmus Mundus Joint Master in "Chemical Nano-Engineering" is a two-year, 120 ECTS Master's Programme which provides a broad multidisciplinary education in the emerging domain of nano-engineering, with strong specialization in chemistry and modeling of nano-objects. The graduates will have a double competence, experimental and numerical, in design, synthesis and applications of nano-systems. The Erasmus Mundus Joint Master Degree in "Chemical Nano-Engineering" is offered by the Consortium of three Universities: Aix-Marseille University in France, Wrocław University of Science and Technology in Poland and University of Roma Tor Vergata in Italy. These universities have a long experience of common research projects and teaching collaborations in the framework of Erasmus program. They are providing an excellent environment for Nano-Engineering studies and opportunities for students to participate in research projects conducted by world-class researchers. Upon the completion of the two-year cycle, successful students will be awarded a Joint Master degree. In addition, the CNE consortium furnishes a joint degree-supplement providing a description of the nature and level of the program followed. The language of the CNE Master is English. The consortium offers an innovative and integrated programme, based on a jointly developed curriculum and composed of lectures fully recognized by all consortium partners. The first semester is in Marseille, at Aix-Marseille University, where the students learn the basics and fundamental background of chemistry, then they study more engineering at Wrocław University of Science and Technology and applications of complex nano-systems at University of Rome Tor Vergata. The programme is focused on the methodology of bottom-up designing nano-systems and using modeling to design chemical synthesis at the nano-scale. Our pedagogical, scientific and engineering goals are focused on tools (chemical synthesis, characterization and numerical design of nano-objects) with potential application in nanomedicine and nano-machines. The development of the principal subjects builds the student competences as future nano-engineering experts. The traditional materials science courses have been adapted for the presentation of the macro towards nano evolutions of materials properties. Applicants must have

a Bachelor's degree in Chemistry, Chemical Engineering, Physics or Materials Science, with a good background in mathematics and chemistry. The graduates will be well prepared for both continued research in nano-engineering, as Ph.D. students or R&D associates in industrial laboratories in the rapidly emerging nanotechnology industry.

ABOUT STUDIES

CONTENT

The main study of Chemical NanoEngineering consists of at least 23 units, covered as lectures, labs and seminars. In addition some optional units are offered covering also language courses.

SEMESTER 1

- » Nano-Electrochemistry
- » Solid State Chemistry and Nanomaterials
- » Organic Chemistry of Nanomaterials
- » Basic Quantum Chemistry Modelling
- » Computational Modelling of Nano-Systems
- » Thermodynamics of Materials-Interactions and Surface Forces
- » Nano-engineering Seminar + Project
- » Language (English) C2

SEMESTER 2

- » Structure and Crystallography of Solids
- » Synthesis and Fabrication of Nano-engineering Systems
- » Fabrication of Smart Polymers
- » Engineering of Nano-machines
- » Bio-photonics
- » Biomaterials-Biomedical Devices
- » Nanostructures in Industrial and Numerical Applications
- » Economics and Management
- » Nano-engineering Seminar + Project

SEMESTER 3

- » Nanoscale Synthesis Methods
- » Macromolecular and Supramolecular Chemistry
- » Characterization of Nano-engineering Systems
- » Nanoscale Energy Technology, Nano-sensors and Microfluidics
- » OPTION A : Chemistry
- » NMR of Nanosystems
- » Structural and Function Properties of Biopolymers
- » OPTION B : Modelling
- » Nanoscale Structural Transformations and Kinetics
- » Probability and Statistical Methods for Modelling Engineers
- » Nano-engineering Seminar + Project
- » Language (English) C2

SEMESTER 4

- » Master's Thesis

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

Medicinal chemistry is a scientific discipline at the intersection of chemistry and computational science, involved with designing, synthesizing and developing new pharmaceutical drugs. At the beginning, medicinal chemistry was involved in the screening of natural sources like plants or animals. Now the natural compounds serves as the leading compounds in the synthesis and development of new chemical entities suitable for therapeutic use. Medicinal chemistry includes the synthesis and analysis of existing drugs, evaluation of their biological properties, analysis of structure-activity relationships as well as design and synthesis of new drugs or search for their natural sources. It is a highly interdisciplinary discipline widely using advanced, synthetic, spectroscopic and computational methods. Thus, medicinal chemists cooperate with theoretical chemists, synthetic chemists, medical doctors, microbiologists, pharmacologists. The graduation document certifies the degree in chemistry with the notification of a deepened specialization in Medicinal Chemistry. Study for applicants without engineering degree study lasts 2 years, otherwise 1.5 years only.

ABOUT STUDIES

- » **Duration:** 3 or 4 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:**
October 2019 (4 semesters programme, for applicants without engineering degree)
February 2020 (3 semesters, for applicants possessing engineering degree)
- » **Programme coordinator:**
Prof. Roman Gancarz, Ph.D., D.Sc.
roman.gancarz@pwr.edu.pl

JOB PROSPECTS

The students are educated in the field of chemistry, mainly synthesis, structure analysis including spectroscopic methods, molecular modeling and they have training in medicinal chemistry. Some students, depending on their master thesis topic, may accomplish part of their research and/or graduate laboratory at Medical University in Wrocław, under supervision of medical doctors or in the Institute of Immunology and Experimental Therapy in Wrocław. Master's programmes provide many of the skills needed in scientific laboratories as well as in modern chemical and pharmaceutical industry.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree in Chemistry or related domains.

Each application is assessed individually on its merits.

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

Fine chemicals (FCs) are formulations containing one or more complex chemical substances as active ingredients – serving both an immense range of a purity specification, and ability to deliver a particular effect. FCs are thus identified according to their custom-designed properties and performance formulations. FCs' manufacturers produce a wide range of chemical substances, which are typically of a high added-value and produced in relatively low amounts, mainly by batch processes in multipurpose plants. Specifically there are following FCs product categories:

- pharmaceutical products (chemical and biological processes),
- plant health products and biocides,
- specialty polymers,
- specialized surfactants and dispersed systems,
- dyes and pigments,
- polymer additives,
- nutraceuticals, cosmeceuticals and food additives,
- nanomaterials,
- catalysts for green chemistry and their applications in technological processes
- organic intermediates and custom-designed products.

Study for applicants without engineering degree lasts 2 years, otherwise 1.5 years only.

ABOUT STUDIES

DESCRIPTION

This course will give students multidisciplinary knowledge of electronics, optoelectronics, microwaves and telecommunications. It will enable them to obtain theoretical and practical knowledge in designing applied electronic system based on analogue and digital techniques, lasers, fibres and microwave electronics as well as gaining expertise in microprocessors, programmable logic applications and signal processing. Additionally, students will gain laboratory experience and became familiar with work practices of research laboratories

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinator:** Jerzy Witkowski, Ph.D., jerzy.witkowski@pwr.edu.pl

JOB PROSPECTS

The graduate will acquire the experience necessary for a professional career in industry, research units and universities, and will be prepared for 3rd level studies(Ph.D.)and have been acquainted with the circumstances and the environment of prestigious laboratories. They will possess well above standard skills in English communication.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Electrical, Electronic, Computer Engineering or related disciplines.

DESCRIPTION

The programme of study is focused on delivering multidisciplinary knowledge and developing theoretical and practical skills in the areas of computer science, information technology, systems, and control engineering. The course specialization is very attractive – the students are involved in research while preparing projects in individual manner or as a team, in particular during the three-semester course on Research Skills and Methodologies. The programme contains more than 50% of active forms like classes (tutorials), laboratory training, and preparing assigned projects. The students will have opportunities to spend a part of study with WUST and another part of study in the United Kingdom. There are also possibilities to get two MSc Diplomas – from WUST and from a foreign university, after getting 90 ECTS and preparing proper Final Projects at both universities.

Leszek Koszałka, Ph.D.
leszek.koszalka@pwr.edu.pl

JOB PROSPECTS

The graduate will have gained knowledge in computer science, computer engineering, and experience in designing practical applications, especially for computer industrial and control systems. They will be prepared for solving problems in informatics, control sciences, and technology (especially designing computer systems for industry using classical and intelligent solutions) and gaining information from the literature and other sources. They will be able to play the role of the leader of a team and to organize and to run research debates. They will have acquired the experience necessary for professional career at research units, industry and at universities and colleges. They will have gained substantial international experience and have been acquainted with the circumstances and the environment of prestigious laboratories. They will possess well above standard skills in English communication.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Informatics, Computer Science, Computer Engineering, Information Technology, Teleinformatics, Computer Systems, Robotics, Control, Control Engineering, Systems, Electronics, Telecommunications.

Each application is assessed individually on its merits.
If in doubt, please contact the Admission Officer.

- » **Deadline for application:**

CONTENT

SEMESTER 1

- » Research Skills and Methodologies-1
- » Discrete Mathematics
- » Signal, Systems and Control
- » IT Applications in Business and Commerce
- » Information Systems Modeling
- » Computer Project Management
- » Social Communications
- » English B2+/Polish Language
- » Physics

SEMESTER 2

- » Research Skills and Methodologies-2
- » Optimization Methods: Theory and Applications
- » Secure Systems and Networks
- » Methods of Computational Intelligence and Decision Making
- » Modelling and Optimization of Computer Networks
- » Elective: e.g., Information Storage and Management
- » AIC – 1 Diploma Seminar
- » Foreign Language/Polish Language

SEMESTER 3

- » Research Skills and Methodologies-3
- » Elective: e.g., Modern Software and Hardware Management
- » Introduction to Computer Vision
- » AIC – 2 Diploma Seminar
- » Business Entrepreneurship
- » Final Project (MSc Thesis)

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

Robots are increasingly entering our lives. Robotics is a branch of science integrating many cutting-edge technologies: electronic circuits, computer science and engineering, mechanical science and mechatronics, cybernetics and biocybernetics, artificial intelligence, sensor technology, vision processing, natural language communication, modern psychology, brain model studies and others. Modern electronic design increasingly leads to the construction of embedded devices, which are complete microprocessor and computer systems integrated with the host devices. Such embedded systems can be found in: automobiles, avionic and naval systems, telecommunication systems, medical life-support systems, automated cash and banking systems, but also in household appliances and consumer electronics devices. In particular, the construction of all advanced robotic systems involves embedded electronics. The graduates of Embedded Robotics are prepared for creative engineering activities in the field of industrial and service robotics, embedded electronics, and also for research and scientific work including third level studies (Ph.D.). The specialized knowledge of the graduates includes control engineering methods, embedded design and analysis, robot motion and task planning methods, robot controllers, drive systems, human-robot interfaces. The instructors of this program have a significant research and publications record in robot control theory, as well as an extensive experience building prototype mobile, intelligent, and social robots.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinator:**
Elzbieta Roszkowska, PhD, D.Sc.
elzbieta.roszkowska@pwr.edu.pl

JOB PROSPECTS

The Embedded Robotics programme aims at delivering the knowledge and developing the skills necessary for a successful career in Robotics and/or Embedded Systems, in industry, research and development, expert consulting and alike activities. The graduates gain an understanding of the principles, methods and processes of embedded electronics engineering and robotics, allowing them to creatively use this knowledge at work. Typical activities include solving problems in the field of analysis, design, development, integrating, deployment, debugging and maintenance of embedded and robotic systems.

Specifically, the graduates can pursue an industry, research and development, business or administration career as:

- » design engineer and/or programmer of embedded systems and circuits,
- » implementation/deployment specialist of industrial robotic systems, robotics systems specialist, integrator, project manager,
- » control systems engineer, embedded control devices and systems specialist, building and home automation systems design engineer,
- » expert/consultant for robotic systems deployment, including intelligent and social robots.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree in Electrical Engineering or related field. Minimum 210 ECTS.

Each application is assessed individually on its merits. If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT - 87points or 6.5 points IELTS. List of accepted language certificates can be checked online
- » **Tuition fee:**

CONTENT

SEMESTER 1

- » General Control and Robotics Courses
- » Mathematics Background Courses
- » Embedded Systems
- » Foreign Language
- » Social Communication

SEMESTER 2

- » Robotics Courses
- » Advanced Control for Autonomous Systems Courses
- » Control and Robotics Courses
- » Specialization Project and Seminar

SEMESTER 3

- » Selected Topics in Robotics
- » Master's Thesis
- » Diploma Seminar
- » Entrepreneurship

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The programme is focused on delivering knowledge and developing skills needed for a successful career in Computer Science and Engineering, particularly in designing and maintaining complex service-oriented information systems. It develops abilities to solve non routine problems and to formulate opinions based on incomplete information. The programme covers professional topics as well as R&D teamwork. Special attention is given to the ability to work in multinational industrial teams. The curriculum covers topics in software development and analysis, networking, web services, human interfaces and security of complex information systems.

ABOUT STUDIES

- » **Duration:** 3 semesters or 4 semesters (depending on previous studies)
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:**
February 2020 in case of 3 semesters programme
1st October 2019 in case of 4 semesters programme
- » **Programme coordinator:**
Dariusz Caban, Ph.D.
dariusz.caban@pwr.edu.pl

JOB PROSPECTS

The graduates will have knowledge and skills needed for a career in computer and software organisations, research units, industry, in government administration and in education. They will be particularly well prepared to work on the implementation and maintenance of new generation web services. They will have the experience necessary for professional career and to undertake level III (Ph.D.) education. They will possess well above standard skills in communication in multinational teams.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Computer Science, Computer Engineering, Information Technology, Informatics, Teleinformatics, Telecommunication or related. When applying for 3 semesters programme the degree must be obtained in an engineering programme of studies of at least 3.5 years duration (equivalent to 210 ECTS). In case of 4 semesters programme, the required degree must be obtained in studies of at least 3 years duration, equivalent to 180 ECTS.

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT– 87 points or 6.5 points IELTS . List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **2000 EUR** per semester
EU/EFTA students: **no tuition fee**
- » **Application fee:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl

CONTENT

The programme includes traditional lectures and hands-on study forms (mainly laboratories and design projects). In the 3rd semester, student is also required to complete the individual final project and write a thesis on its basis. The diploma examination, the passing of which is required to obtain the Master's title, covers topics of the completed courses and a presentation of the thesis.
The courses delivered in each semester are as follows:

SEMESTER 0 (only in 4 semesters programme)

- » Computer Architecture and Networking
- » Digital Circuits Design
- » Operating Systems - Advanced Techniques
- » Software Engineering
- » Foreign/Polish Language

SEMESTER 1

- » Signal, Systems and Control
- » Computer Project Management
- » IT Applications: Electronic Media in Business and Commerce
- » Information Systems Modeling
- » Discrete Mathematics
- » Research Skills and Methodologies-1
- » Social Communications
- » English/Polish Language
- » Physics

SEMESTER 2

- » Multimedia and Computer Visualization
- » Application Programming - Java and XML Technologies
- » Information Systems Analysis
- » Advanced Databases
- » Secure Systems and Networks
- » Softcomputing
- » Foreign Language

SEMESTER 3

- » Application Programming: Data Mining and Data Warehousing
- » Application Programming: Mobile Computing
- » Seminar
- » Final Project
- » Entrepreneurship

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The course will be offered following an agreement between the University of Nottingham and Wrocław University of Science and Technology. It is anticipated that the student will spend one part of the study with WUST and another part with UoN. The student will get two Master's Diplomas: one from WUST and one from UoN subject to completing the required number of ECTS points from each institution and successfully completing the final project which will be jointly supervised by the academics from both participating institutions. This course will give students knowledge of optical networks, their components, radio and satellite communications. The Master's contains active training in the form of classes, laboratory training and project work.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Electronic Engineering, Teleinformatics, Telecommunications or related disciplines.

Each application will be assessed individually on its merits.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT – 87 points or 6.5 points IELTS. List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: 2000 EUR per semester (for Wrocław University of Science and Technology Poland)
- » EU/EFTA students: **no tuition fee** (for WUST PL)
Non EU/EFTA students: **8 437,50 GBP** (the amount includes the dissertation fee – **1 687,50 GBP**) per semester (for University of Nottingham UK)
- » WUST students: **2 887,50 GBP** (the amount includes the dissertation fee – **577,50 GBP**) per semester (for UoN UK)
- » **Application fee:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl

JOB PROSPECTS

The graduate will have gained knowledge and skills needed for a career in telecommunications industry, research units and in government administration. The graduates will not only be well prepared to work on the design and maintenance of new generation of telecommunication networks but also for undertaking Ph.D. studies at world-leading telecom research institutions.

The structure of action under “Studies at WUST conducted together with UoN”

WUST students who pass the first semester of the MSc degree studies with an average of 4 (Polish grading system) will be eligible to continue their courses of studies at the University of Nottingham (see the table below)

YEAR	University	Details
Year 1, Semester 1 February – June	Wrocław	Modules taught at WUST credited at UoN in September
Year 1, Semester 2 September – February	Nottingham	Modules taught at University of Nottingham
Year 2, Semester 1 March – June	Wrocław	Jointly supervised dissertation

Upon returning to WUST, those students who obtain 30 ECTS/60 UoN Credits will continue their studies in the third semester. Students will be required to pass the third semester at WUST in order to qualify for the WUST award under the Programme. Students will present their dissertation in English with an abstract in Polish. Final exam and dissertation will be the basis for granting the title *magister inżynier* (Master of Science) for the dual degree programme. Concurrently students will be considered for the title of MSc Modern Telecommunications at UoN in accordance with rules and regulations governing both UoN and WUST.

CONTENT

SEMESTER 1

- » Advanced Network Techniques
- » Optical Network Elements
- » HF Techniques in Telecommunications
- » Numerical Methods
- » Social Communication
- » Optics
- » Mathematics Statistics
- » Foreign Languages

SEMESTER 2

- » Optical Networks
- » Photonic Communication Components
- » Multimedia Systems
- » Satellite Communication
- » Mobile Networks
- » Mobile Applications
- » Compression of Information
- » Orthogonal Filtering of Stochastic Signals
- » Embedded Systems
- » Specialization Seminar

SEMESTER 3

- » Security in Teleinformatics Systems
- » Optical Networks
- » Digital Receivers
- » UWB and THz Techniques
- » Final MSc Project
- » MSc Seminar

DESCRIPTION

The students can spend full duration of the studies in Wrocław University of Science and Technology (WUST) or benefit from the Double-Degree option. The joint double degree programme is run together with Ryerson University (RU) in Toronto, Canada (possibility of exchange for Polish and Canadian citizens only) and Brandenburg University of Technology (BTU) in Cottbus, Germany, University of Palermo (UNIPA), Italy, RWTH Aachen University, Aachen (Germany) I. The goal of the program is to improve the quality of graduate-level education and training in the field of control engineering. It is focused on new and challenging issues of power system automation and control. The programme offered by the Faculty of Electrical Engineering is split up into four semesters, including a Master's Thesis semester and a 4-week industrial placement. The best students willing to study in Toronto should spend their first year at RU and second year at WUST. Alternatively, the students can study their first year at BUT in Cottbus or at UNIPA in Palermo and then continue their second year at WUST.

ABOUT STUDIES

- » **Duration:** 4 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:**
1st October 2019 at WUST or BTU (Double Degree Programme),
1st September 2019 at RU (Double Degree Programme)
1st September 2019 at UNIPA (Double Degree Programme)
- » **Programme coordinator:**
Robert Lis Ph.D., D.Sc. Assc. Prof.
robert.lis@pwr.edu.pl

JOB PROSPECTS

The programme is devoted to the candidates interested in work related to electric power system control, reliability, transmission and distribution of electrical energy, protection and decision-making in power systems, energy market issues etc.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Electrical Engineering or related field.

Each application is assessed individually on its merits. If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
14th April 2019- for students who want to take part in Double Degree Programme at WUST/RU
1st June 2019- for students who want to take part in Double Degree Programme at WUST/BTU, WUST/UNIPA, WUST/RWTH
1st term - 21st July and 2nd term - 13th September 2019 – for students who want to take full four semesters at WUST
- » **English:** Equivalent of minimum TOEFL IBT – 87 points or 6.5 points IELTS . List of accepted language certificates can be checked online: www.rekrutacja.pwr.edu.pl
- » **Tuition fee:**
Non EU/EFTA students: **2000 EUR** per semester
EU/EFTA/Ryerson University students: **no tuition fee**
- » **Application fee:**
Non EU/EFTA students see: www.admission.pwr.edu.pl
EU/EFTA students see: www.rekrutacja.pwr.edu.pl

Courses at WUST:

Semester 1

- » Numerical and Optimization Methods
- » Power Quality Assessment
- » Power Systems Faults
- » Fault Calculations
- » Dynamics and Control of AC and DC Drives
- » Circuits and Systems
- » Advanced Technology in Electrical Power Generation
- » Foreign language – A1 or A2
- » Foreign language – B2+ or C1+

SEMESTER 2

- » Digital Control Techniques
- » Simulation and Analysis of Power System Transients
- » Digital Signal Processing for Protection and Control
- » Power System Protection
- » Fiber Optics Communications and Sensors
- » Renewable Energy Sources
- » Electric Power System Operation and Control
- » Diploma Placement 4 Weeks
- » Elective course from Management block

SEMESTER 3

- » Advanced High Voltage Technology
- » Artificial Intelligence Techniques
- » Power System Automation and Security
- » Electrical Power Systems Management
- » Electromagnetic Compatibility
- » Measurement Methods and Techniques
- » Diploma Project
- » Elective courses from Law block

SEMESTER 4

- » Diploma seminar
- » Master's Thesis
- » Elective course from Social Sciences and Ethics block
- » Elective course from A block and B block

DESCRIPTION

The students of the programme can spend full duration of the studies in Wrocław University of Science and Technology (WUST) or benefit from the Double-Degree option. The DD option is a proposal for a limited number of the best applicants. After having spent one year in Wrocław, the students are sent for the remaining year to the Otto-von-Guericke Universität Magdeburg (OvGU), Germany or they can choose the double degree option with Irkutsk National Research Technical University (INRTU) in Russia or with University of Palermo (UNIPA), Italy. After having spent one year at partner University, the students spend the remaining year at home University (Poland). Following the successful completion of the degree requirements at both Universities the students will obtain two Master's of Science degrees from the WUST and from the University of Magdeburg (OvGU) or from the WUST and Irkutsk National Research Technical University (INRTU) or from University of Palermo (Italy). The programme is focused on the modern issues related to renewable energy sources and their integration in power system.

DESCRIPTION

Graduate's profile: A graduate will possess abilities to use in depth knowledge of problems within the domain of basic sciences, main-field-of-study and specialization subjects. The graduate will be able to manage and supervise teams, deal with high-risk situations and decisions, and use competently the knowledge of law and economics. The graduate will be prepared to design technological processes, carry out research work and work creatively.

ABOUT STUDIES

CONTENT

Knowledge will be provided in the form of lectures, tutorials, laboratories, computer labs, project works and seminars

SEMESTER 1

- » Theory and Practice in Geomechanics
- » Computer Aided Geological Modelling & Geostatistics
- » Project Management, Appraisal and Risk Evaluation
- » Engineering Geophysics
- » Integrated Analysis of Deformations in Geomechanical Engineering
- » Occupational Health and Safety
- » Excavation Design in Open Pit Mining

SEMESTER 2

- » Machinery Systems
- » Tunnel and Underground Excavation Design
- » Computer-Aided Mine Design
- » Ventilation and Mine Fires
- » Issues in Nuclear Physics
- » Auto Cad
- » Foreign Languages
- » Free Elective

SEMESTER 3

- » Mineral Processing Systems
- » Environmental Management
- » Process Automation
- » Operations Research
- » Free Elective
- » Diploma Seminar, Master's thesis

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

This is a joint MSc program of WUST and University of Miskolc (Hungary) formatted as a structured student mobility. WUST students study two semesters in Wrocław (first and third semester) while the second semester is offered by University of Miskolc. Students apply for an Erasmus Plus grant for the mobility period. In the third semester students write and defend their Master's thesis at WUST.

Graduate profile: An alumnus becomes a specialist in two fields: geotechnical and environmental engineering, which is a very unique profile. Besides that, a graduate will be able to apply in depth knowledge of basic sciences. The graduate will be able to manage and supervise teams, deal with high-risk situations and decisions. The graduate will be prepared to design technological processes, carry out research work, and work creatively.

CONTENT

Knowledge will be provided in the form of lectures, tutorials, laboratories, computer labs, project works and seminars

SEMESTER 1

- » Theory and Practice in Geomechanics
- » Computer Aided Geological Modelling & Geostatistics
- » Project Management, Appraisal and Risk Evaluation
- » Engineering Geophysics
- » Integrated Analysis of Deformations in Geomechanical Engineering
- » Occupational Health and Safety
- » Environmental Chemistry

SEMESTER 2

- » Methods of Environmental Assessment
- » Waste Incineration and Air Quality Protection
- » Water and Wastewater Treatment
- » Environmental Geotechnics
- » Chemical Technologies in Environmental Protection
- » Environmental Risk Assessment and Remediation
- » Soil Chemistry
- » Numerical Methods and Optimisation
- » Quality Management
- » Basics of Waste Management
- » Environmental Geology
- » Foreign Languages

SEMESTER 3

- » Mineral Processing Systems
- » Excavation Design in Open Pit Mining
- » Process Automation
- » Free Elective
- » Foreign Language
- » Diploma Seminar, Master's thesis

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The graduate will have obtained knowledge in environmental engineering and experience in technology of the protection of the environment. They will be prepared for solving problems in sustainable development and technology and gaining information from the literature and other sources.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** October 2019 (for 4 semesters) and February 2020 (for 3 semesters)
- » **Programme coordinator:**
Prof. Wojciech Adamski, Ph.D., D.Sc.
wojciech.adamski@pwr.edu.pl

JOB PROSPECTS

The graduate will be able to play the role of the leader of the team and to organize and run research debates. They will have acquired the experience necessary for a professional career at research units, industry and at universities and colleges. They will have gained substantial international experience and have been acquainted with the circumstances and the environment of prestigious laboratories.

ENTRY INFORMATION

Bachelor's Degree in either of the following: Environmental protection, Environmental engineering, Chemistry, Earth Sciences.

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT - 87 points or 6.5 points IELTS. List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **2000 EUR** per semester
EU/EFTA students: **no tuition fee**
- » **Application fee:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl

CONTENT

Forms of teaching: lectures, laboratories, seminars, classes, computers classes.

SEMESTER 1

- » Environmental Chemistry
- » Engineering Application of Mathematical Statistics
- » AutoCAD
- » Water Treatment Technology
- » Raw Materials Management
- » Sanitary Biology
- » Water Quality Management
- » Water Supply Systems
- » Automation in Environmental Engineering
- » Polish Language A1 or English Language C1+
- » Elective Subject
- » Ethics of New and Emerging Technologies
- » Strategic Management

SEMESTER 2

- » Environmental Management
- » Membrane Separation Processes in Environmental Protection
- » Environmental Toxicology
- » Waste Gases Purification
- » Solid Waste Management
- » Waste Water Treatment Technology
- » Biodegradable Materials
- » Sewage Systems
- » Environmental Health Hazards
- » Polish Language or Another Language
- » Spatial Planning
- » Reliability of Engineering Systems
- » Reliability of Engineering Systems

SEMESTER 3

- » Organization of Construction Works
- » Building Regulation
- » Renewable Energy Systems
- » Elective Subject
- » Diploma Seminar
- » Diploma Project

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

This programme contains courses from three subject groups: management, formal methods in decision making and applications of computer science in management. The management courses cover macroeconomic phenomena, management methods and concepts, the legal basis for business activities, as well as sociological, psychological and ethical aspects of management. The courses offered within the second group concern methods which are useful in decision making, such as advanced methods of analysing business data, data mining, discrete optimization, network flows, decision games etc. The courses related to applications of computer science in management cover integrated information systems, identification and analysis of management problems, analysis of requirements and are related to the tools and methodologies applied in business information systems. Students have the opportunity to attend organized classes and also work individually. At the end of their studies, students are obliged to prepare an MSc dissertation and to pass a final (diploma) exam. The knowledge and skills obtained during their studies give graduates the possibility to find jobs in the field of management (including software project management), as managers, analysts, advisors and consultants in business or non-profit (public) organizations. The knowledge and skills obtained also provide a good basis for successfully running one's own business activities or advance further to third degree study (Ph.D., doctoral study) in the area of formal methods and applications of computer science in management.

ABOUT STUDIES

- » **Duration:** 4 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** 1st October 2019
- » **Programme coordinator:**
Prof. Rafał Weron,
rafal.weron@pwr.edu.pl

JOB PROSPECTS

The knowledge and skills obtained give graduates the possibility of getting a job as:

- » an analyst of management information systems (MIS),
- » an analyst of decision making processes,
- » an analyst of enterprise business processes,
- » a consultant in the area of management computerization,
- » a business information systems requirements engineer,
- » a management information systems implementation officer,
- » a management information systems maintenance officer,
- » a manager/director of an information technology department/section,
- » in public and private organizations (industry, healthcare, education, services, commerce, central and local authority institutions, etc.).

ENTRY INFORMATION

Requirements: Bachelor's Degree or Bachelor of Engineering Degree.

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer:
admission@pwr.edu.pl

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT - 87 points or 6.5 points IELTS. List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **2000 EUR** per semester
EU/EFTA students: **no tuition fee**

CONTENT

Forms of teaching: lectures, laboratories, tutorials, projects, seminars, research.

SEMESTER 1

- » Business Statistics
- » Information Systems Analysis
- » Internet Information Services and Systems
- » Logistics Management Tools
- » Legal protection of information
- » Macroeconomic modeling
- » Management Accounting
- » Operations Research
- » Process Management

SEMESTER 2

- » Business Data Analysis
- » Discrete Optimization and Network Flows
- » Econometrics
- » Contemporary Management
- » Management Information Systems
- » Management Information Systems Modeling
- » Seminar I

SEMESTER 3

- » Business Process Modeling
- » Data Mining
- » Games and Decisions in Management
- » MSc Thesis I
- » Business Object Modeling
- » e-Economy
- » Organizational Psychology
- » Seminar II

SEMESTER 4

- » Foreign Language
- » Polish Language
- » Management Ethics
- » MSc Thesis II
- » Strategic Management
- » Work Environment Physics II
- » Legal Protection and Commercialization of Knowledge
- » Sports

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The final effect of studies at the Master level is obtaining knowledge, skills and qualifications in accordance with "Teaching Standards" in the field of Computer Science. Students receive extended knowledge in the area of specialization. Students who finished study will be able to: use various methods and techniques, formulate and solve specific problems related to computer science, become team work leaders. Additionally, they will have obtained fluent and creative knowledge application in the area of specialization, which means mathematical models designing, problems formulating and solving, problem oriented information systems analysis and testing.

ABOUT STUDIES

- » **Duration:** 4 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** 1st October 2019
- » **Programme coordinator:**
Andrzej Siemiński, Ph.D.
andrzej.sieminski@pwr.edu.pl

JOB PROSPECTS

Employment in informatics companies and organizations which apply informatics tools and systems at the specialists and manager positions.

ENTRY INFORMATION

Requirements: Bachelor's Degree, preferably in Computer Science or in a related area. Applicants with a Bachelor's Degree outside of Computer Science must demonstrate significant proficiency in computer science. Any area of requirements can be satisfied through courses completed at the bachelor level or by suitable experience

Each application is assessed individually on its merits. If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT - 87points or 6.5 points IELTS . List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **2000 EUR** per semester
EU/EFTA students: **no tuition fee**
- » **Application fee:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl

CONTENT

Within this program students must complete 1200 hours of courses equivalent to 120 credits (ECTS) and have to write a degree thesis under the supervision of a faculty member. The programme consists of lectures and practical activities (laboratories, tutorials, seminars and projects).

SEMESTER 1

- » Advanced Databases
- » Advanced Topics in Artificial Intelligence
- » Information System Modelling and Analysis
- » System Modelling and Analysis
- » Foreign language I
- » Foreign language II

SEMESTER 2

- » Parallel and Distributed Computing
- » Software System Development
- » Modelling and Analysis of Web-based systems
- » Mobile and Multimedia Systems
- » Foundations of Knowledge Engineering

SEMESTER 3

- » Physics of Contemporary Computer Science
- » Recent Advances in Computer Science
- » Ethics of new technologies
- » Fundamentals of Business and Intellectual Property
- » MSc Thesis I

Modules of optional courses (select one of the courses within the module)

M 3.1:

- » Parallel Computer Architecture
- » Advanced Computer Network

M 3.2:

- » Advanced Computer Graphics
- » Digital Image Processing
- » Multimedia Information Systems
- » User Interface Development

M 3.3:

- » Data Warehouses
- » Expert Systems

SEMESTER 4

- » Research Methodology
- » Business modeling and analysis
- » Monographic Subject
- » Diploma Seminar
- » MSc Thesis II

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

A graduate has the knowledge and skills in designing, testing and operation of power plants using nonconventional energy sources in a wide spectrum of degree of conversion and energy storage methods.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinator:**
Dorota Nowak-Woźny, Ph.D.
dorota.nowak-wozny@pwr.edu.pl

JOB PROSPECTS

After graduation from the programme a student will be prepared to work in energy industry. In particular, our graduate will have a good base to work:

- » on designing of equipment using renewable energy
- » on creating new solutions in renewable energy power
- » in supervising the work of renewable and hybrid energy systems
- » to assess the effectiveness of the use of renewable energy sources, depending on the location of the investments
- » to determine and assess the local and global energy strategy

ENTRY INFORMATION

Requirements: Bachelor's Degree in the related field.

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT - 87points or 6.5 points IELTS. List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **2000 EUR** per semester
EU/EFTA students: **no tuition fee**
- » **Application fee:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl

CONTENT

SEMESTER 1

- » Quantum Physics
- » Numerical Methods
- » Probability Theory
- » Physics of the Renewable Energy
- » Fuel Cell and Technology of Hydrogen Production
- » Water Power Engineering
- » Power Production Systems and Technology for Biomass
- » Foreign Language B2+

SEMESTER 2

- » Mathematical Modeling of Energy Generation Installation
- » Refrigeration Heating
- » New Generation Energy Technologies
- » Photothermal Energy Conversion Systems
- » Wind Power Plants
- » Geothermal Power Engineering
- » Thermonuclear Power Generation
- » Master's Individual Student Project
- » Foreign Language (next language, any level)
- » Humanities Course (elective)

SEMESTER 3

- » Marketing and Management
- » Management Course (elective)
- » Energy Systems
- » Master's Seminar
- » Master's Thesis
- » Sports

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

A graduate has the detailed knowledge of devices and installations dedicated for cooling down to -150°C and, in the case of cryogenics, for temperature lowering below 120 K and down to fractions of Kelvin. He or she has the skills in the designing, implementing and operation of both refrigerating and cryocooling systems. Additionally, a graduate can apply creatively modern design methods and is well prepared for undertaking Ph.D. studies.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinator:**
Stefan Reszewski, Ph.D.
stefan.reszewski@pwr.edu.pl

JOB PROSPECTS

The graduates of the Refrigeration and Cryogenic programme will be prepared to work in all industrial branches that apply refrigeration and cryogenic technologies. In particular, our graduates will have a good base to:

- » design modern refrigeration and cryogenic units and installations,
- » create new solutions and methods of temperature lowering,
- » supervise the work in food cold stores, refrigeration and air conditioning installations, air rectification and technical gas production plants, natural gas liquefaction plants and other refrigeration and cryogenic systems.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Power or Mechanical Engineering and in any related field.

Each application is assessed individually on its merits.

If In doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT - 87points or 6.5 points IELTS . List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **2000 EUR** per semester
EU/EFTA students: **no tuition fee**
- » **Application fee:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl

CONTENT

SEMESTER 1

- » Mechanics Analytical
- » Modern Engineering Materials (CAMD /CAMS)
- » Mechatronics and Control System
- » Compressor Refrigeration Systems
- » Refrigerants and Coolants
- » Heat Pumps
- » Air-Condition Systems
- » Thermodynamics Fundamentals of Refrigeration Cryogenics and Low Temperature Physics
- » Cryogenics
- » Cryogenic Materials and Fluids
- » Foreign Language B2+

SEMESTER 2

- » Modelling and Optimisation
- » Cooling Systems and Refrigeration Plants
- » Absorption Refrigeration
- » Gas and Cryogenic Technologies
- » Applied Superconductivity
- » Cryogenic Systems
- » Introduction to Numerical Flow Phenomena Analysis
- » Integrated Production Systems
- » Foreign Language (next language, any level)
- » Humanities Course (elective)
- » Master's Individual Student Project

SEMESTER 3

- » Failure Analysis of Machine and Device
- » Master's Seminar
- » Master's Thesis
- » Management Course (elective)
- » Marketing and Management
- » Sports

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

At the end of the Master's programme the students will have a sound base of general scientific knowledge in the field of Automotive Engineering. The curriculum encompasses contemporary issues related to automotive industry including innovative design, materials science, quality, safety and ecology. The students will be sufficiently equipped and motivated for a life-long qualification in the field of Automotive Engineering. They will be prepared to implement their knowledge and to cooperate within an organization. In making decisions and performing their tasks, they will be guided by social, economical and ecological principles.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinator:**
Adam Jednoróg, Ph.D.,
adam.jednorog@pwr.edu.pl

JOB PROSPECTS

They will have acquired insight in the technological principles and will have a thorough knowledge of more specialized subjects and will be well aware of energy and environmental issues.

ENTRY INFORMATION

- Requirements: Bachelor's Degree.
Each application is assessed individually on its merits.
If in doubt, please contact the Admission Officer.

CONTENT

SEMESTER 1 – 26 contact hours

- » Applied Mathematics - Operational Methods in Automotive Engineering
- » Testing of Vehicle Elements and Assemblies
- » Energy Efficiency Design of Power-train and Body
- » Modelling of Multi-Body systems
- » Machinery Design Process
- » Analytical Mechanics
- » Surface Engineering
- » Design of Engineering Materials
- » Machine and Device Control Systems
- » Strength of Materials
- » English language B2+

SEMESTER 2 – 26 contact hours

- » Project CAD /FEM for Metals
- » Project CAD /FEM on Flows
- » Developing Engine Technology
- » Alternative Drive Systems
- » Electronics in Vehicles
- » Chemistry and Green Fuels
- » Management for Engineers
- » Non-Destructive Evaluation in Contemporary Manufacturing Systems
- » Foreign Language – other than English A1 or A2

SEMESTER 3 – 20 contact hours

- » Automotive Expertises
- » Safety of Vehicles
- » Ecology of Road Transportation
- » Communication for Engineers
- » Diploma Seminar
- » Master's Thesis

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The goal of these studies is to provide students with knowledge and skills necessary to manage a production company. The curriculum encompasses issues related to company management, planning, organization and control of manufacturing processes. Students learn about the latest methods of production management and IT techniques essential for the use of computer systems in company management. The knowledge and skill from many various disciplines such as: production organization, quality management, logistics, computer science, economics, basics of law, mechanics and construction of machines, means that their education is universal and useful in production engineering and services in all sectors of economy.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinator:**
Adam Jednoróg, Ph.D.,
adam.jednorog@pwr.edu.pl

JOB PROSPECTS

The graduates of the programme are specialists in production technology design and implementation, management system maintenance. They can develop production and exploitation systems. They have knowledge and skills related to: personnel management, controlling, cost management, capital and physical investments management, they know marketing, logistics and distribution related issues essential from the management perspective. The curriculum encompasses a lot of practical classes which is why the graduates are very well prepared to work as soon as they complete their studies and thanks to the knowledge of professional English their value in the job market is even higher. They will be employed companies manufacturing goods or services.

ENTRY INFORMATION

Bachelor's Degree in: Control Engineering and Robotics, Mechanical Engineering and Machine Building, Transport, Management and Manufacturing Engineering or related.

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT–87 points or 6.5 points IELTS. List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **2000 EUR** per semester

www.rekrutacja.pwr.edu.pl

CONTENT

SEMESTER 1

- » Methods for Formation of the Selected Product Features
- » Operational Research
- » Operation Maintenance of Manufacturing Machines and Devices
- » Project and Innovation Management
- » Physicochemical Advanced Functional Materials
- » Technology Planning CAD\CAM
- » Modeling of Production Processes
- » Factory Layout Planning and Optimisation
- » Strategic Management
- » Foreign Languages B2+

SEMESTER 2

- » Flexible Manufacturing Automation
- » Recycling of Materials
- » Mapping of Business Processes
- » Reverse Engineering
- » Product Lifecycle Management
- » Innovative Mechanical Technologies
- » Simulation of Production Processes
- » Integrated Management Systems
- » Documenting and Audit of Quality Management Systems
- » Master's Thesis I
- » Foreign Languages A1 / A2

SEMESTER 3

- » The Methods and Techniques of Experiment
- » Innovative Entrepreneurship
- » Case Studies
- » Knowledge Management
- » Innovative Mechanical Technologies
- » Machines and Equipment Safety
- » Human Resources Management
- » Humanistic Course
- » Diploma Seminar
- » Master's Thesis II

Questions? Please contact the Admission Officers

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 37 10, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The programme is focused on computer security, including both advanced knowledge as well as practical skills. The target is to cover the current topics, but at the same time to develop creative approach for solving future problems and to acquire the ability to design new pragmatic technologies in the area of computer security, privacy and cryptography. Apart from core technological topics of computer security, procedural and legal issues as well as security management are concerned.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinator:**
Prof. Mirosław Kutylowski
miroslaw.kutylowski@pwr.edu.pl

JOB PROSPECTS

The programme aims to prepare security professionals who design, implement, audit, and run computer security systems. In particular, they may be responsible for protection of data and IT resources of private enterprises as well as public institutions, in accordance with emerging legal obligations.

ENTRY INFORMATION

Bachelor's Degree: undergraduate degree in one of the following fields: Computer Science, Electronics, Mathematics, Telecommunication, Teleinformatics.

Each application is assessed individually on its merits. If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:

CONTENT

OBLIGATORY COURSES:

- » Cryptography
- » System Security
- » Security with Embedded Systems
- » Compliance and Operational Security

SUPPLEMENTARY COURSES, IN PARTICULAR:

- » Electronics for Security Engineers
- » Physics for Security Engineers
- » Randomized Algorithms
- » Humane-Machine Interaction
- » Identification Systems
- » High Performance Computing
- » Applied Stochastics with Applications for Security and Privacy
- » Data Mining
- » Cloud Computing and P2P
- » Distributed Algorithms
- » Ad Hoc Systems
- » Databases
- » VLSI
- » Digital Signal Processing
- » Telecommunication Systems
- » Group Programming Project

DESCRIPTION

The graduate has in-depth knowledge of these areas of physics, computer science and mathematics which are useful for modeling and solving problems related to the analysis of large information resources. The graduate knows the most important directions of research in the field of analytics of large data sets (Big Data Analytics), complex systems theory and statistical physics and has skills to: (1) use IT tools and technologies to process large amounts of data, (2) use methods of physics of complex systems to study and model the analyzed information resources, (3) find or design an adequate model of the observed dynamic phenomenon and verify it on the basis of empirical data. The graduate will be prepared to work in a dynamically developing market sector related to the statistical analysis of large data sets, aiming to uncover, among others, hidden patterns, market trends, customer preferences, etc.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time

DESCRIPTION

The curriculum of Electronics, Photonics, Microsystems (EPM) specialization encompasses up to date knowledge in the field of electronics and electronic technologies, computer science, optoelectronics, microsystems, optical fiber networks, telecommunication and wireless communication. Stress is laid on the achievements of technology which play an important role in today's telecommunication, photovoltaics (an alternative energy source – solar cells), design of optoelectronics devices and systems as well as optoelectronics and nanometrology. A significant place in the curriculum is occupied by subjects related to electronic and optoelectronic systems and microsystems that integrate unique high-tech device solutions and constructions. Emphasis is also put on the microsystems which create new progress opportunities in nearly all areas of human activity from motor industry and banking to medicine and natural environment protection. A complementary subject is microprocessor control systems which perform important functions in all types of electronic and optoelectronic equipment. The graduate will have gained experience in technology and retrieving information from the literature and other sources. Wide spectrum of novel technologies – from nanotechnology and photonics, through micro engineering to microelectronic and information techniques – are discussed in details during lectures given by experienced teachers. Well-equipped didactic and technological laboratories will help students to understand new knowledge and possess unique skills in the field of high-tech. Educational facilities of the Faculty of Microsystem Electronics and Photonics include unique laboratories at technological campus Długa.

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinator:**
Damian Pucicki, DSc,
damian.pucicki@pwr.edu.pl

JOB PROSPECTS

The graduate will have multidisciplinary knowledge in the field of widely understood electronics and its versatile applications in every-day life and science, which is an appreciated tool by future employers and is necessary to overcome technical and technological challenges in these professional fields. They will be able to play the role of a leader of the international team and to organize and run research debates in the fields of electronics, photonics and microsystems. They will have acquired the experience necessary for professional career at research units, industry and at universities.

The knowledge and skills obtained give graduates the possibility of getting a job as:

- » Design/Application Engineer
- » Innovation Officer
- » Senior Research Specialist
- » Senior Manager Business Development and Project Manager
- » Competence Engineer
- » Process Development Engineer
- » R&D Technical Lider & Planing Lider

and start their own business as well.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Electronics and Telecommunication.

Each application is assessed individually on its merits. If in doubt, please contact the Admission Officer.

- » **Deadline for application:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl
- » **English:** Equivalent of minimum TOEFL IBT – 87points or 6.5 points IELTS . List of accepted language certificates can be checked online
- » **Tuition fee:**
Non EU/EFTA students: **2000 EUR** per semester
EU/EFTA students: **no tuition fee**
- » **Application fee:**
Non EU/EFTA students see:
www.admission.pwr.edu.pl
EU/EFTA students see:
www.rekrutacja.pwr.edu.pl

CONTENT

The education is based on: lectures, tutorials, laboratories and seminars.

SEMESTER 1

- » Autonomous Power Supplying Systems
- » Vacuum and Plasma Techniques
- » Optical Fibers
- » MEOMS
- » Nanotechnology
- » Solid State Electronics
- » Optimization Methods
- » Numerical Methods
- » Statistics for Electronics Photonics Microsystems
- » Mathematics
- » Foreign Language

SEMESTER 2

- » Management Course
- » Foreign Language
- » Ceramic Microsystems
- » Analytical Microsystems
- » Microsystem Modelling
- » Photovoltaics
- » Design and Construction of Optoelectronic Circuits
- » Operating Systems
- » Optical-Fiber Networks
- » Advanced Optoelectronics

SEMESTER 3

- » Philosophy of Science and Technology
- » MSc Thesis
- » Diploma Seminar
- » Diagnostics and Reliability
- » Packaging of Electronics Photonics Microsystems
- » Sensors and Actuators

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The programme, offered by the Faculty of Pure and Applied Mathematics and run in a cooperation with the Hugo Steinhaus Center, is based on educational standards of the European Consortium for Mathematics in Industry (ECMI) that is confirmed by the status of ECMI Teaching Center Wrocław University of Science and Technology obtained in 2014. The curriculum is oriented towards real life applications and industrial problems in educational style and contents. The goal of the studies is the real world applied mathematics education of specialists who are well prepared not only for work in the international financial institutions or enterprises, but also for any situation in which the creative thinking is needed. The graduates have no problems with finding good jobs in the finance and insurance or industrial sectors in Poland and abroad. The MSc diploma offers an opportunity to continue education at Ph.D. studies.

The programme offers four main specialties:

- » Financial and Actuarial Mathematics
- » Mathematics for Industry and Commerce
- » Data Engineering
- » Modelling, Simulation and Optimization

ABOUT STUDIES

- » **Duration:** 3 semesters
- » **Mode of study:** Full time
- » **Language of instruction:** English
- » **Start date:** February 2020
- » **Programme coordinators:**
Marek Teuerle, Ph.D.,
marek.teuerle@pwr.edu.pl

Marcin Magdziarz, Ph.D., D.Sc., Prof. WUST
marcin.magdziarz@pwr.edu.pl

JOB PROSPECTS

The graduates will have obtained knowledge in mathematics and economics/finance; experience in pricing financial and actuarial contracts, modelling, simulations and optimization and computational methods. They will be prepared for solving problems in the financial/actuarial and industrial sectors and gaining information from the literature and other sources. They will possess organizational skills and experience necessary for a professional career at research units, industry and at universities and colleges.

ENTRY INFORMATION

Requirements: Bachelor's or Master's Degree in Mathematics, Economics/Finance, Management, Computer Science, Physics, Chemistry, Biotechnology, Civil Engineering, Electronic Engineering, Electrical Engineering, Teleinformatics, Telecommunications, Geology Engineering, Mining Engineering, Mechanical Engineering, Power Engineering, Energy Related Engineering, Environmental Engineering, and related domains obtained either in Poland or abroad.

Each application is assessed individually on its merits.

If in doubt, please contact the Admission Officer.

CONTENT

SEMESTER 1

- » Economathematics
- » Partial Differential Equations with Applications in Physics and Industry
- » Life Insurance Models
- » Social Elective Subject
- » Foreign language
- » Elective Course
- » Elective Course

SEMESTER 2

- » Optimization Theory
- » Agent-based Modelling of Complex Systems
- » Social Elective Subject
- » Foreign Language
- » Elective Course
- » Elective Course
- » Elective Course

SEMESTER 3

- » Diploma Thesis
- » Diploma Seminar
- » Elective Course

Elective Courses

- » Financial Risk Management
- » Computational Finance
- » Insurance Models for Industry
- » Reserves in Life and Non-life Insurance
- » Risk Management in Insurance
- » Numerical Methods in Differential Equations
- » Introduction to Applied Fluid Dynamics
- » Perturbation Methods
- » Applied Functional Analysis
- » Nonlinear Methods
- » Introduction to Inverse Problems
- » Free Boundary Problems
- » Diffusion Processes on Complex Networks
- » Analysis of Unstructured Data
- » Statistical Packages
- » Computer Simulations of Stochastic Processes
- » Estimation Theory
- » Mathematical Image Processing
- » Queues and Communication Networks
- » Advanced Topics in Dynamic Games
- » Operations Research
- » Optimal Control
- » Introduction to Big Data Analytics
- » Data Mining
- » Machine Learning
- » Introduction to Compressed Sensing

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The Department of Polish Language for Foreigners offers courses of Polish language and Polish culture on different levels – A1, A2, B1, B2, C1 and C2. They are intended for candidates who wish to prepare for future studies at all academies in Poland and also for those who want to learn Polish intensely. The courses of Polish language last for the whole academic year (from October to June). They include 20 lessons of Polish language per week (5 times a week, 4 lessons a day). The first term contains 300 hours of Polish language and so does the second term. The students also learn supplementary subjects preparing them their further studies. The supplementary subjects can be selected according to students' needs out of the following: (mathematics, physics, biology, computer sciences, geography, knowledge of Polish culture and history – dependent on the students' needs). The students start learning the specialization courses on the advanced level in the winter term and on the elementary level – in the summer term. The specialization subjects are taught in Polish. The courses, thanks to the fact that they are carried out on different levels, guarantee a communicative dexterity in both official and unofficial situations. At the same time, the courses prepare the candidates for studying on different faculties. The students improve basic linguistic competences: listening comprehension, reading comprehension, speaking and writing different kinds of text. Additionally, some lectures and classes on Polish history and culture are carried out in Polish and English. The course finishes with a written and oral examination in Polish language and with examinations in all chosen subjects. The Department of Polish Language for Foreigners provides also additional activities, such as: tourist tours to the most interesting regions of Poland, visiting some historical places in Wrocław and participating in different cultural events. Taking part in the course, the students learn about important traditions and customs of the Poles.

ENTRY INFORMATION

The University admission procedure based on secondary education certificate or degree certificate. Each application is assessed individually on its merits. If in doubt, please contact the Admission Officer.

- » **Mode of study:** Full time, 600 hours
- » **Duration; start date:** 1 academic year (2 semesters) – 1st October 2019
- » **Tuition fee:** 2 000 EUR – 1 year course;
Deadline for application: admission.pwr.edu.pl
- » **Language of instruction:** Polish
- » **Application fee:** EU/EFTA students: **150 EUR**
Non EU/EFTA students: **150 EUR**
- » **Contact:** Office of International Affairs
Division of International Students Admissions
e-mail: admission@pwr.edu.pl

CONTENT

The curriculum of learning Polish as a foreign language on the elementary level A includes subjects connected mostly with a person (personal data, education, general look, family relations, leisure time activities, health etc.). Subsequent themes contain: the surrounding of the man (both immediate: living place, students' hostel etc. and more distant: city and its institutions), every day routines, plants, animals, weather and climate.

THE GRAMMATICAL MATERIAL INCLUDES:

- » declination of the nouns, adjectives, pronouns and numerals;
- » verb inflexion, transitive and intransitive verbs, voices and moods of the verbs, impersonal forms of the verbs, modals and verbs connected with movement;
- » comparison of the adjectives and adverbs;
- » classifying words into different parts of speech;
- » syntax of a single and compound sentence, double negation, punctuation.

The curriculum includes typical communicative situations, as well.

THE GRAMMATICAL MATERIAL INCLUDES:

- » declination of the nouns, adjectives, pronouns and numerals;

COURSES:

- » Polish history has been presented from the oldest to the contemporary times. The course has been divided into parts determined by dates of great significance to the society and the state.
- » The purpose of the **geography** course is to present the social and economic situation of the world with a special emphasis on Poland.
- » The most important **chemistry** problems are the following atoms, solutions, electrolytes, hydrolysis, matter, reactions of oxidation and reduction electrochemical processes and organic chemistry.
- » Selected areas of **biology** cover, among others, the skeletal system, muscular system, cardiovascular system, lymphatic system, digestive system, nervous system and reproductive system.
- » Participants of **mathematics** classes will have an opportunity to get to know the language and terminology used in mathematics. They will also have a chance to make up for the secondary school knowledge they miss (e.g. digits, geometric figures, fractions, mathematical actions, functions, sequences, etc.).
- » The purpose of the **physics** course is giving participants an opportunity to understand the phenomena of the surrounding world and nature, the structures of physics and its connections with other natural sciences (kinematics, dynamics, thermodynamics, electrostatics, optics, contemporary physics, electric current).

e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 37 19, +48 71 320 44 39

DESCRIPTION

The Department of Foreign Languages at Wrocław University of Science and Technology offers preparatory courses to foreigners who want to study BSc and MSc courses in English at Wrocław University of Technology. The course includes 600 hours of English (20 hours of English per week- 5 times x 4 hours a day), 120 hours of Polish (4 hours a week) as well as 90 hours of mathematics and 60 hours of physics. To start the course of English students should be at intermediate level B1 as set forth in Common European Framework for Language, Teaching and Assessment. The aim of the course is to help students improve their language skills and reach B2 level (68-74 Cambridge ESOL Bulats test) and to introduce English for academic purposes in order to enable them to follow the university courses in English. The preparatory course of English lasts for the whole academic year (from October to June) and is divided into two semesters. In the first semester students learn general English with professional language elements. The second semester covers a balance of language skills (speaking, listening, reading, writing), grammar and vocabulary with a special focus on academic language. The course builds the skills required for understanding lectures, tutorials, research papers and written assignments in English. At the end of the course students take examinations in English, physics and mathematics. The English examination is at B2 level and consists of two parts a written test and an interview. The participants will be provided with coursebooks and other teaching materials to be used at the preparatory English course all free of charge. The final examination is Cambridge ESOL Bulats online test. It tests listening and reading skills, speaking, knowledge of grammar and vocabulary. The exam registration fee is included in the price of the course. Throughout the academic year students will be provided with an opportunity to go on 1-2 day trips to discover the most beautiful places in the region. Students will also be able to take part in talk and lectures about history of Wrocław and Poland, cultural events, technical English and more.

CONTENT

ENGLISH COURSE SYLLABUS 1ST TERM

Speaking

- » communicating in social situations
- » communicating in professional and intercultural environment
- » telephoning: making enquiries, making arrangements, complaining
- » focusing on functions: agreeing and disagreeing, giving opinions, interrupting and dealing with interruptions, asking for clarification
- » discussing a wide range of personal and study / work **related topics:** culture and cross-cultural relations, university and business related environment, training and development, describing innovative products and services, business travel, buying and selling
- » focusing on pronunciation: word and sentence stress, sound linking

Listening

- » understanding real life situations
- » following instructions
- » listening for general meaning, details, pronunciation, stress and intonation

Reading

- » understanding written instructions
- » understanding story sequence
- » understanding authentic writing

Writing

- » organising writing
- » using a range of styles
- » writing formal and informal letters and emails
- » writing CVs and letters of application

Grammar

- » revision of tenses
- » conditionals
- » question forms
- » comparatives
- » dependent prepositions
- » relative clauses
- » indirect speech

Vocabulary

- » building a personal lexicon based on topical vocabulary
- » business vocabulary
- » formal and informal vocabulary

ENGLISH COURSE SYLLABUS 2ND TERM

Academic Speaking

- » communicating in seminars and tutorials
- » delivering an oral presentation
- » focusing on functions: expressing and justifying opinions, explaining, suggesting, speculating, analysing, summarising, narrating
- » recognising a range of styles
- » speaking without hesitating

Academic Listening

- » understanding lectures and tutorials
- » following presentations
- » note taking

Academic Reading

- » understanding specialist and non-specialist academic writing
- » identifying text types
- » scanning and skimming

Academic Writing

- » organising writing
- » expressing fact and opinion
- » describing and comparing graphs and tables
- » describing processes
- » writing a report
- » writing a summary
- » writing an argumentative essay
- » using quotations
- » paraphrasing
- » recognising levels of formality

Grammar for Academic Purposes

- » understanding choice of tense
- » impersonal style and passive constructions
- » modal verbs
- » forming complex noun phrases
- » changing emphasis in a sentence
- » expressing causality and purpose

Vocabulary for Academic Purposes

- » language for classifying
- » word formation
- » confusable words
- » technical and semi-technical vocabulary
- » researching specialist vocabulary
